MANAGING QUALITY. IMPROVING PERFORMANCE.

At SPGL, we are passionate about enhancing the quality and compliance of your projects with our comprehensive suite of GxP audit services. Our offerings span the entire lifecycle, from the pioneering phases of early development to the crucial stages of post-marketing surveillance. Our team, brimming with seasoned experts, is dedicated to ensuring that your projects not only meet, but exceed industry standards.

We prioritise timely delivery and a commitment to stay within your financial plan, making us the ideal partner in your project's journey towards excellence.

Our services can be performed either at your site or a location of your choice where the value of collaboration is maximised or remotely embracing flexibility without compromising on quality! The choice is yours.

Explore our array of services designed to bring out the best in your projects:

- **Good Clinical Practice (GCP):**
Uphold the integrity and ethical standards of your clinical research
- **Good Laboratory Practice (GLP):**
Ensure the reliability and consistency of your laboratory operations
- **Good Vigilance Practice (GVP):**
Maintain the utmost vigilance in monitoring the safety of your products
- **Computer System Compliance (CSC):**
Align your computer systems with stringent regulatory requirements
- **Good Manufacturing Practice (GMP):**
Achieve impeccable standards in your manufacturing processes

MANAGING QUALITY IMPROVING PERFORMANCE

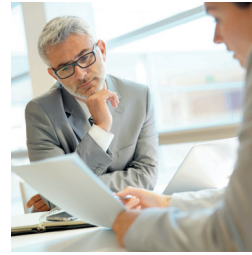

Elevating Compliance

At SPGL, our consultants are not just experts; they are seasoned navigators in the complex realm of compliance. With a profound understanding and extensive experience, they are adept at pinpointing the compliance challenges that pose the greatest risks to your organisation. Our approach is all about blending critical thinking with practical solutions to address compliance hurdles swiftly and effectively.

We are advocates of a risk-based approach, meaning we don't just fix problems — we pre-emptively manage them. This proactive stance ensures that SPGL is not just a service provider; we are a strategic ally in fortifying your organisation's compliance posture.

At SPGL, we guarantee uniform excellence in training for our consultants across all procedures, standard operating practices, and systems, regardless of whether they are SPGL's own or those of our clients. Each deliverable is subjected to a rigorous two-level peer review within our organisation before it is issued. As a result, our clients can always expect deliverables of the utmost consistency and quality.

At the heart of delivering solutions to our clients lies our commitment to innovation and technology, ensuring our clients maintain a competitive edge.

Choose SPGL to expand your horizon!

Worldwide Reach for Diverse Clientele

Our global presence is second to none. SPGL's auditors have meticulously conducted GxP audits across 70+ countries, catering to a diverse clientele that ranges from international powerhouses to small and medium-sized enterprises. Our dedication to excellence knows no borders. With strategic presence in London and Antwerp, and a network of consultants around the globe, we are equipped to provide stellar services to healthcare organisations anywhere in the world.

A Commitment to People

At the heart of SPGL lies a robust team of full-time and seasoned consultants, each boasting over a

decade of QA expertise, spanning across four continents. Our growth is rooted in people – both ours and yours. By ensuring safe, responsible, and practical travel for our consultants, we position ourselves to offer comprehensive support to a wide array of clients, reinforcing our pledge to put people at the forefront of everything we do.

Technology & Infrastructure Excellence at SPGL

SPGL aligns with leading and esteemed IT providers to enhance our service offerings for our valued clients. By harnessing advanced technologies and implementing robust, end-to-end encryption for document sharing, we ensure that our clients receive not only efficient and secure services but also gain

valuable, actionable insights. Our commitment to technological innovation is at the core of delivering top-tier support and maintaining client trust.

Data Security: Our Top Priority

At SPGL, we take data protection seriously, implementing robust measures to secure the data entrusted to us by our clients. We adhere to the highest standards, aligning our practices with the 'state of the art' requirements of GDPR. To fortify data against external risks, we have established multiple layers of internal compliance protocols to provide peace of mind that your information is in safe hands.

MANAGING QUALITY. IMPROVING PERFORMANCE.
